Interviewer-Scheduler   Sep 2022

- Single page application (SPA) built with React that allows users to book, edit and cancel interviews.
- Data is persisted by the API server using a PostgreSQL database.
- The client application communicates with an API server over HTTP, using the JSON format.
- Any updates can be seen in real time by scket.io.

Tools - JavaScript, React, SASS, Node.js, Express.js, PostgreSQL, Scket.io

WORK EXPERIENCE

GIP Co., Ltd —— Concert Promoter   Mar 2015 - Jun 2021

- I worked as a manager, managed from small to big scale live concerts and music festival for 60k people every year.
- From bugdet control to operating the event on site, I engaged many types of events not only music concert.
- Collaborated with local broadcasters and planned on creating a music event from scratch.
- After covid-19 happened, to host an event safely, produced 10+ document about the measure against Covid-19 in concert venue. And succeeded in every event.

SUMMARY

Well-rounded web developer with experience in building full-stack web application.

Currently working on a full-stack schedule organizing application with React and Node.js etc.
