PROJECTS

Jobseed (collaborative)   Oct 2022 - Jan 2023

A full stack application that enables users to organize, track, and sort information about companies based on their status and interests. Designed and built fully responsive SPA. Managed user state with JWT, cookie, React Context and Reducer. Applied features such as searching company location with Google API, and managing schedule.

Stacks : React.js Typescript Tailwind Node.js Express.js PostgreSQL

PPlane (collaborative)   Dec 2022 - Current

This application helps newcomers to Vancouver, especially those in the tech field, find a mentor. And enables to find a mentor who matches your schedule, categories, and budget. Collaborated with UI/UX designers and communicated with them through Zeplin and figma. Engaged in building reusable component and overhauled MUI theme in order for other developers to unify the design.

Stacks : Next.js Typescript MUI

Nature Buddy   Jan 2023 - Current

A fully functional CRUD application that enables users to create, delete, and modify their events as well as their user information. This application allows users to find people with whom they can engage in outdoor activities nearby. Optimized rendering method for best user experience and dynamic API request.

Stacks : Next.js Typescript MongoDB Socket.io MUI

WORK EXPERIENCE

GIP Co., Ltd - Concert Promoter   Mar 2015 - Jun 2021 (6yrs3mths)

Engaged in the operation and ticketing of up to around 100 concerts annually. Achieved over 20M in sales 3years in a row and oversaw the biggest stage in a self-hosted music festival that had 60k attendance as a manager. Adopted one-on-one mentorship with new employees by offering monthly casual meeting.

EDUCATION
