Misato Tanno

Frontend Developer

PROJETCS

Jobseed (collaborative)   Oct 2022 - Jan 2023

- A full-stack application that enables users to organize, track, and sort information about companies based on their status.
- The application manages user state with JWT and cookies. Once a user creates an account, they can store data related to a company, such as its location, interview schedule, and application stage.
- To manage user state, I used React Reducer and Context.

Tools - React.js, Typescript, Tailwind, Node.js, Express.js, API PostgreSQL

PPlane (collaborative)   Dec 2022 - current

- Collaborated with UI/UX designers and communicated with them through Zeplin and figma.
- This application helps newcomers to Vancouver, especially those in the tech field, find a mentor. And you can find a mentor who matches your schedule, categories, and budget.
- MUI theme allows our developer team to unify the design and prevent the design from being cluttered.

Tools - React.js, Next.js, Typescript, MUI, API, GraphQL, headlesCMS

Nature Buddy   Dec 2022 - current

- A full-stack application that allows users to find people with whom they can engage in outdoor activities nearby.
- This application let you sign up / login with your existing Google, Facebook, and GitHub account not only your email.
- This is a fully functional CRUD application that enables users to create, delete, and modify their events as well as their user information.

Tools - React.js, Next.js, NextAuth,Typescript, MUI, API, MongoDB, Socket.io, Express.js

WORK EXPERIENCE

GIP Co., Ltd —— Concert Promoter   Mar 2015 - Jun 2021

- Engaged in the operation and ticketing of up to around 100 concerts annually.
- I've been put in charge to oversee the main stage at our company's self-hosted music festival, which had 60k attendance.
- I have collaborated with local broadcasters and successfully planned and executed a music event, which marked the 4th time last year.
- Contributed to each concert by selecting and proposing venues that were suitable for the artist, managing the budget, and operating the concert with attention to detail.

SUMMARY

Well-rounded front-end developer with experience in building full-stack web application.

From my background in entertainment industry, I am always detail oriented and skilled at comprehensively considering a course of action for problem-solving.
